

DESIGNER BRIEF:

# The Brewery Cup

She enlisted the services of Gráinne of Architectural Spaces. Her brief was to make adjustments to the spatial plan and design a warm and uplifting interior.

Working closely with Majella, Gráinne made amendments to the counter allowing more space to circulate for the staff and customers. The design of the mirror detail which continues along the main wall gives a feeling of space as well as drawing the eye to the rear of the shop. In addition, the long mirror allows customers, with their backs to the counter, to see what is happening behind them - very fung shui! The fabric on the back of the fixed seating is rich in design and colour and complements the fresh flowing wallpaper above. The new green wall panelling continues around the front of the counter and the same punch of green was used on the wall shelves behind the counter which enhances the fresh green in the wallpaper and upholstery fabric. The addition of the outside box planting on the window cill gives the entrance an individual look while allowing privacy to the customers inside.

The Brewery Cup is inviting and fresh and together with a new delicious menu it is a must visit especially for a yummy slice of cake and a great coffee on those crisp shopping days!

When Majella Kilcoyne decided to refurbish her premises in Castlebar, she wanted her coffee shop to be that little bit extra special for her customers. She has built up a good customer base over the past twelve years and wanted to be sure of their continued support as well as welcoming new customers.
